1 | FAST FACTS

*Ideas that are not apparent are often the biggest ideas. AirBnB is a good example.
Who thought there was a business with private room renting to compete with hotels?*

SiQuis Software - Fast Facts

1. Identity

SiQuis Software is a Pacific Northwest based software development company. We've created a digital framework for people to build, manage and grow "passion-based" businesses online.

2. Participants

Virtually anyone or any entity interested in following their passions as a career or business.
Recently described as the: "Passion Economy".[\[1\]](#)

3. Problem

Without something tangible to monetize, entrepreneurs interested in following their passions as a career are unable to create sustainable businesses online. There are no turn-key, single-solution platforms available to combine community and commerce around knowledge, experiences and expertise alone.

4. Our Solution

A customizable framework entrepreneurs can use to create branded and engaging websites focused on verticals within horizontal markets. We've created tools to generate website traffic, build community, create value and monetize that value.

5. The Competition

There are quite a few platforms for creators, influencers and gig-economy professionals interested in monetizing a tangible product or service, but very few that have the infrastructure to create and monetize communities on experiences, expertise and knowledge alone.

Facebook - Indirect competitor; Social Media - they control monetization model. (everything actually!)

Hivebrite - Indirect competitor; Community portal - Great community app, but no commerce

Kajabi - Indirect competitor; Coaching platform - you must create content to monetize

Mighty Networks - Indirect competitor; Creator/Coaching platform - must create content

Patreon - Indirect competitor; Creator platform - membership into a person's content

Revue - Indirect competitor; Writers' platform - publish content for a fee

Socio - Indirect competitor; Event community platform - Event engagement

VerticalScope - Indirect Competitor; Community platform for online enthusiast communities.

6. Revenue Streams

Recurring Fees:

- SaaS Subscriptions fees
- Credit card processing and handling fees

One-Time Fees:

- Setup and consulting fees
- Integration fees
- Custom programming fees

7. Marketing Opportunity

The market opportunity for Si Quis Software is broad, under served and supported by financial opportunity for our clients.

Described as the "Passion Economy"

Market size: TAM 2020 ~ \$38B USD,

SAM 2020 ~ \$9.8B USD,

SOM 2020 ~ \$200M+ USD.

Estimated CAGR ~ 14%. [\[8, 10\]](#)

8. Marketing Activities

We will deploy a company-owned beta-site using the Si Quis platform: **Aircraftwest**, and use both "organic" (SEO optimization) and "paid methods" (paid advertising using agencies) to market and generate traffic for the site. Helping clients address the "Cold-Start Problem", [\[15\]](#)build network effect and monetize value created are primary objective. Aircraftwest will provide valuable insights real-time into client site marketing practices as well as tactics to generate Si Quis Software leads.

9. Financial Considerations

The SiQuis framework is still in development and will require investment to complete. Our three-phased approach will ensure a measured roll out with opportunity to adjust directionally as more data is developed. In summary, we are seeking \$500K - convertible note as described in the "Legal Information" below.

OVERVIEW

2 | Our Company and Purpose

Si Quis Software (*Siquisoft.com*) [\(1\)](#) is a Pacific Northwest based software development company. We create a customizable framework for people to build, manage and grow “passion-based” businesses online. Virtually any type of passion-based business is possible and virtually any number of unique websites can be built using our framework.

We view passion-based businesses as verticals within horizontal markets that are uniquely positioned to appeal to highly productive market segments (fiercely passionate individuals) by focusing on their core interests and commerce within these verticals.

The emergence of the “Passion Economy” — a new model of internet-powered entrepreneurship, [\[2\]](#) is gaining momentum in both number of participants and financial opportunity. It is the space in which Si Quis Software intends to operate. [\[3\]](#) More about the "Passion Economy" below.

The Si Quis platform is different from other platforms operating within the Passion Economy. We not only enable creators, influencers and gig-economy professional to build new businesses or enhance their existing ones, we make it possible for virtually anyone who has experiences, expertise and knowledge about something they are truly passionate about to build a business, create community and monetize the audience.

3 | The Problem

Two Sets Of Problems:

Our client's problems, and their customer's problems. We solve for both of them.

Problems Our Clients Face:

Today, entrepreneurs (creators, influencers and merchants) have multiple options available to them to help set up and operate online businesses, each with a unique business proposition and revenue model. Yet they all have one thing in common; they need something tangible to monetize. Additionally, many of these entrepreneurs are looking for ways to monetize passively and not be constantly looking for their next engagement or product to sell.

For people or entities that do not have something tangible to monetize, there are few options beyond the Meta Platforms. In this scenario, building community, creating value and capturing that value requires multiple and likely disparate platforms to create financial critical mass, creating complexities in management and systems integration.

Of no less significance, the past 18 months has intensified work/life balance requirements for many and created a need to establish meaningful and sustainable work remotely. On a brighter side of this requirement many people are also interested in pursuing their passion as a career.

1. Today's platforms focus on tangible items to monetize.
2. Entrepreneurs are looking for ways to passively monetize their audiences.
3. Multi-platform complexities are barriers to entry.
4. Work/Life balance options are real necessities and desires.

Problems our client's customers face:

The Si Quis platform solves for two problem sets simultaneously. In addition to the problems our clients face, their customers are looking for solutions to their problems as well.

The US is approaching 1.8 billion websites and growing at double digit rates and on average, 4.4 million blog posts occur every day in the US. Finding credible, relevant and timely information about individual interest is becoming complicated and time consuming. Although finding products (new and used) and services is relatively easy to do on-line, buying and selling remains primarily transactional and does little to foster the interactions that build community and trust around brands, products and services. Moreover, people are craving privacy, safety, and a respite from the throngs of people on social platforms. All of this and more represents an emerging dynamic that people are facing and looking to change. [3]

1. It's time consuming to follow interests on-line.
2. Consumers are finding it harder to distinguish fiction from fact.
3. Buying and selling products and services on-line is primarily transactional.
4. Large swaths of audiences have lost trust with Social Media giants.

4 | Our Solution

We envision thousands of our websites created and moderated by individuals and companies interested in sharing their knowledge and expertise about their passions. Each site creating value for its audiences and capturing that value in the form of monetization and personal fulfillment for its owners.

Si Quis Software accomplishes this by providing four fundamental functions within each website to address head-on the problems facing our clients and their customers.

Content, Resources, Conversations and Commerce

Read more...

1. Content:

We provide functionality to create content and/or curate content. Our client's expertise and knowledge sets the bar for relevancy and trustworthiness and provides a distinct point of view on topic.

2. Resources:

We provide tools to create directories of trusted companies, products and services. In addition, we provide interactive forums for companies to showcase, demonstrate, advertise and promote their products and services.

3. Communications:

We provide functionality to empower member-to-member collaboration, communication, and sharing through our Forums module that gathers liked minded individuals dedicated to an organization and its mission.

4. Commerce:

We provide a "full-stack" content management system (CMS) to support commerce on the site. Our Classifieds Advertising module includes back-end management of listings, user accounts, billing information, scheduling, conflict resolution, marketing and more. In addition, our e-commerce module integrates to any number of existing e-commerce platforms to create a seamless user experience between platforms.

Read less...

Within these four fundamentals are digital tools designed to create customizable experiences for our client's customers. In addition, we provide our clients with tools to market and promote their sites and expand their passion-based communities.

As audiences grow, our clients will in turn have multiple opportunities to monetize their sites, including internal and external advertising revenue, membership fees, classified listing fees and e-commerce sales that generate recurring revenue from an assortment of intangible and tangible products.

While the look and feel of each website is unique, the infrastructure supporting them is not. Our back-end management systems provide administrative functionality to autonomously manage, maintain, market and monetize the websites.

In addition, our full-stack, multi-tenant system architecture ensures we are able to efficiently and cost effectively maintain our client's sites, keep track of billing information and grow our revenue streams as our client's businesses thrive.

Our Solution Summarized

1. Fundamentals: Content, Resources, Communications and Commerce - necessary components to build community
2. Focused and authentic purpose: verticals within horizontal markets

3. Create and capture value: multiple ways to monetize site
4. Digital tools: modernized access to data, customized user experiences, tools to manage and grow businesses
5. ADMIN-1 structural components: our ability to maintain and monetize our client's sites

WHY NOW

5 | The Passion Economy

The digital era has given rise to a number of spectacular "economies". The attention economy, the gig-economy and the widget-economy, [4] to name just a few, are responsible for trillions of dollars in economic turn. As these economies mature, fractures in the mechanics of these economies are forcing people to re-address how they make money.

Take for example the gig economy. It's well understood the incredibly efficient digital tools powering it have commoditized freelancers and tied them to time sheets, trading hours for money. It's a race to the bottom, or lowest cost, truly a one-sided buyer's market. [5]

The attention economy has its critics as well. A quick look at Facebook's 2020 [FORM 10-K Annual Report](#) details gross advertising revenue of \$84.17 billion USD, roughly 98% of their total revenue. This implies a revenue stream heavily dependent upon advertising spends, most of which is becoming more and more interested in targeted audiences.

The Passion Economy [6] was largely born out of the waning interest put in the attention economy. Consumers have few illusions about how big social media is profiting from their attention and the practices are beginning to tire them. Emerging out of this exhaustion, the Passion Economy has created space for interactions that are based on sincere, shared passions and interests.

Read more about the Passion Economy here...

In recent months, much has been written about the Passion Economy. We've traced its origins back to Li Jin, Partner at Atelier, an early-stage VC firm and Adam Davidson, an American journalist, author and co-founder of NPR's Planet Money program, when in late 2019, early 2020 respectively, they interchangeably became known with coining the label and defining the space. And rightfully so, the rise of the Passion Economy is now here. Moreover, recent socioeconomic trends and catastrophic global events have converged and are accelerating its growth.

The Passion Economy was largely born out of the waning interest put in the attention economy and is indicative of the continued convergence of technology, entertainment, and media. Today's consumers have few illusions about how social media giants are profiting from their

attention and the practices are beginning to tire them. Emerging out of this exhaustion, the Passion Economy has created space for interactions that are based on sincere, shared passions and interests.

The Passion Economy is a new wave of niche communities that are challenging traditional social media giants. Instead of the generalized and non-specific content of larger social media platforms, the niche communities focus on creating and sharing content that resonates with individuals.

The Passion Economy also differs from what's known as the gig-economy. The gig-economy represents a free market system in which organizations and independent workers engage in short-term work arrangements. It is estimated that the Global gig-economy will be worth \$347 billion USD in 2021 [12]

	The Gig Economy	The Passion Economy
Monetization Model	One-time revenue: pay per trip, per session, etc.	Ongoing revenue based upon building an audience
Services Offered	Narrow, commoditized services	Wide variety of creative products and services
Software Stack	Narrow, commoditized services	Marketplaces that emphasize the individuality of providers SaaS tools that enable providers to run their own businesses
Relationship Between Consumer and Provider	On-demand platforms that commoditize providers	Platforms encourage direct interaction and the loyalty between the service provider and consumer
Levels for Growing the Business	Limited ability for consumer engagement	Expanding audiences and offering a differentiated service or product.
	Doing more: more time spent driving, jobs completed	

Source: Li Jin, 2020

Although the passion, gig and attention economies are fundamentally different, the Passion Economy may very well track the economic trajectory of the gig-economy through disruption of the attention economy. As more and more individuals look to create meaningful financial and

quality of life choices, the Passion Economy will disrupt traditional business models and tap into revenue streams largely controlled by the social media giants.

Read less...

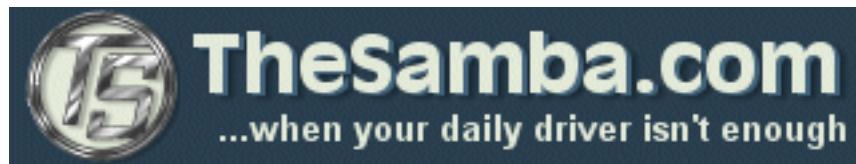

So Why Now?

The Passion Economy is just now entering its expansion phase. Although there are numerous entities scrambling to create the right set of tools to address the market's rise, we've taken a step back and looked closely at how the Passion Economy thrived prior to it ever being defined.

We found two companies in particular that resonate with our vision of a thriving Passion Economy and took a deep look at the things driving their success.

Case Studies #1

[The Samba Platform](#)

TheSamba.com, founded in 1997 by Everett Barnes, has grown into the largest and most dynamic air-cooled Volkswagen community online today, bringing together thousands of enthusiasts in one single site, accessible 24 hours a day, 7 days a week, 365 days a year. Yet, in those early days of the Internet, Everett just wanted a place to post his growing collection of VW photos and literature online.

With 1.6 million+ Gallery photos, 100,000+ free Classified ads, and over 7 million Forum posts, TheSamba.com has gained a global audience of Volkswagen enthusiasts, with over 50,000 unique daily visitors. In addition to the free classifieds, user gallery, and forums, the site currently includes an extensive archive of Volkswagen literature and manuals, a huge technical reference section, and worldwide listings for VW-related events, clubs, links, and businesses.

The Samba business model monetizes its site through advertising and e-commerce sales. Viewers can view the site but must be a registered member to join forms or post classifieds. Membership is free. In addition, the site maintains an older, "legacy" look and feel. Possibly out of necessity, as backend technologies could be decades old, or intentionally to retain their "vintage" brand presence.

Case Studies #2

[Supercub.org Platform](#)

April, 2000 marked the humble beginnings of SuperCub.org. Early versions of the site were dedicated to little bits of information about STC's (Supplemental Type Certificates issued by the FAA) and aircraft modifications, but mostly pictures of people going for rides in the owner's Super Cub, N197T.

Sometime in 2001, a small envelope addressed to the website owner arrived with a Yankton, SD postmark. There were no other markings. Inside was a one hundred-dollar bill wrapped in a hand-written note saying, "I like what you are doing, keep it up". Later, the site owner learned that the money was sent by Dave Tunge, who will always be known as the "Grandfather of SuperCub.Org". This singular generous gift inspired literally thousands of hours of work developing SuperCub.Org into an interactive pilot community and became the basis for the way SuperCub.Org operates today.

SuperCub.Org reaches a wide variety of pilots who are interested in not only Supercubs, PA-12's, and certificated and experimental variants, but also a great number of other airplanes used in bush operations and the pursuit of back country flying - as well as all the other necessities that go along with them.

SuperCub.org generates revenue through annual membership fees at varying levels from \$25 to \$1000 per member. In addition, the site generates revenue through advertising, classifieds listings and e-commerce sales. The site owner has created a niche, passion-based business, and is considered the epicenter for all things related to flying, owning, maintaining, building and storytelling about Super Cub aircraft.

SuperCub.Org receives approximately 95,000 unique visitors per month on their home page. The popular forums have received even more traffic. They have over 13,000 registered members, and nearly ten times as many "lurkers" that read and enjoy their forums and other information available on the site publicly.

In both case studies the site owners were not creators, influencers or merchants when they got started. They were individuals who early on followed their passions and created websites that contained four key fundamentals; **Content, Resources, Conversations and Commerce**, about things they were deeply interested in.

As noted above, "thousands of hours" went into creating their platforms and is an economic and technical barrier for others to create. We believe our platform is a turn-key solution to address these needs and play a leadership role in the thriving Passion Economy.

6 | Market Opportunity

The market opportunity for Si Quis Software is broad, under served and supported by financial opportunity for our clients. Moreover, our target audience is not age specific, location specific or industry specific. Virtually anyone can join the Passion Economy using our platform. [13]

Researchers have pegged the 2020 Passion Economy Total Addressable Market (TAM) at roughly USD \$38.16 Billion. [7] Although difficult to quantify at this early stage, we believe the TAM of the Passion Economy is larger and has greater potential than what's been reported. In general, we believe the Passion Economy is comprised of four components fueling its potential; online advertising, classified advertising, e-commerce sales and the "gig" markets.

TAM - Total Addressable Market

Online and Global: [8]

Advertising: \$378.16 B USD in 2020
Classified Advertising \$22.57 B USD in 2020
E-commerce \$5 T USD in 2020
Gig-economy \$297 B USD in 2020

= **Passion Economy**
\$38B USD
2020

Each of the TAM segments will contribute to the Passion Economy's growth at varying degrees. In our analysis, we believe the Passion Economy will create incremental economic activity across all sectors but will disruptively migrate economic activity towards the "new owners" and away from the traditional norms of today.

Companies that have largely kept advertising revenue for themselves will see competition for these dollars as the Passion Economy platforms provide better access to the audiences driving these spends. [9] To what degree the disruptive migration takes place remains unclear. But a quick look back at the "Passion Economy", from <\$5.0B to \$38B in 2 years, would suggest a groundswell afoot. [10] As previously stated, we believe big social media platforms are at risk and will experience an accelerating loss in existing and incremental revenue streams. We believe the Passion Economy TAM will eclipse \$50 billion by the end of December 2023, representing a CAGR of approximately 14.5%, generally on par with the CAGRs of the TAM segments mentioned above.

Contributing Factors

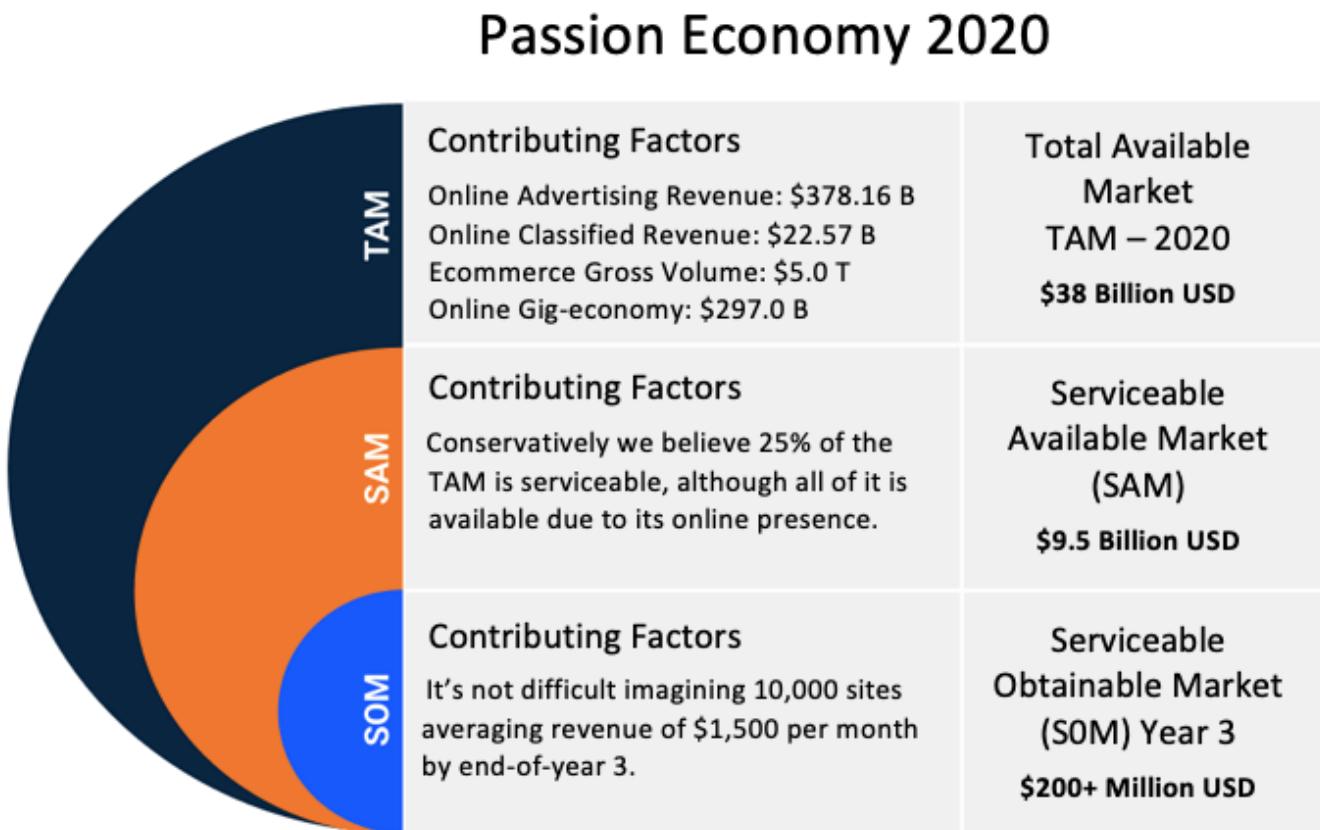

The potential audience is large.

Participant in the Passion Economy are likely aligned with today's gig-economy workers. They are men and women, young and old, who live across the country and reflect the racial, ethnic, and socioeconomic diversity of the country. [\[11\]](#)

A cultural shift in the way people work is underway.

The COVID-19 pandemic has accelerated online economic activity and reconfigured the way in which people work. [\[12\]](#) Although not seamless, the financial and social impacts of working remotely has given rise to a collective desire to work differently across a broad spectrum of disciplines. Moreover, an increasing number of digital platforms are enabling individuals to create, foster and grow meaningful and sustainable businesses of all types **never before imagined**.

Looking at a three-year horizon based upon the size of the Passion Economy TAM today, we see a serviceable obtainable market (SOM) size of ~\$200+ million for Si Quis Software.

7 | Competitive Landscape

In our view, many of the technologies powering the Passion Economy today are focused on "creators". Examples of these platforms include:

Company	Company Description
 hivebrite	Community Management and Engagement Platform
 KAJABI	Build, market and sell your online course, membership site or coaching program
 mighty networks	Bring your community, courses, memberships, and events together in one place under your brand.
 patreon	On Patreon, you can let your fans become active participants in the work they love by offering them a monthly membership. You give them access to exclusive content, community, and insight into your creative process.
 Revue	Build a loyal audience. Revue makes it easy for writers and publishers to send editorial newsletters — and get paid.
 SOCIO™	Build a loyal audience. Revue makes it easy for writers and publishers to send editorial newsletters — and get paid.
 verticalscope	VerticalScope is a technology company that has built and operates a cloud-based digital community platform for online enthusiast communities. Their communities are roll-ups of high-consumer spending categories. - Does not directly support commerce.

While many of these platforms are popular for creators to earn an income, the reality is all of these platforms have a common denominator: the creation or procurement of something to monetize. We know that there is an underserved segment of the Passion Economy yet to emerge. While it's actually been around for quite some time, it is largely owned by a brave few (*like The Samba, Subercub.org and others*) who have had to build their own platforms.

We intend to perfect that platform, making it a turn-key and customizable platform for virtually anyone interested in following their passions.

HOW IT'S DONE

8 | Our Business Model

Our business model is structured to meet high standards of social and environmental performance, public transparency, and legal accountability to balance profit and purpose for our clients and shareholders. In short, we embrace covenants similar to that of "B-Corporations" and when appropriate will incorporate as such. [*Read declaration...*](#)

- We envision a global economy that uses business as a force for good.
- This economy is comprised of passion-based businesses that are purpose-driven, creating benefits for all stakeholders.
- As leaders of this emerging economy, we believe:
- That we must be the change we seek in the world.
- That all business ought to be conducted as if people and place mattered.
- That, through their products, practices, and profits, businesses should aspire to do no harm and benefit all.
- To do so requires that we act with the understanding that we are each dependent upon another and thus responsible for each other and future generations.

Our platform is positioned to address segments of the market that are under served, opening an untapped subset of people looking to join the Passion Economy. In addition, our platform is equally positioned to amplify existing passion-based business by providing functionality not present in the competitor landscape and provide avenues to generate passive income.

We've structured our revenue model to be approachable and flexible with multiple entry points and price levels to accommodate "new-to-market" or "well-established" businesses. This allows clients to invest in what they need now to grow their business and seamlessly layer in feature sets as needed. In addition, we kept the pricing model simple, making it a transparent and fair value proposition.

There are four different platform packages to choose from, ranging in price for \$100/month to \$1,000/month, depending upon the number of feature sets and complexity of a client's site requirements.

For Si Quis, our revenue model provides an ever-increasing and recurring stream of income, enabling us to leverage our existing resources and attract and hire the expertise we need to strengthen our team, create value for our clients and grow shareholder value.

9 | Financial Information

The model behind the financial projections provided here is available upon request.

Email Brent Bostwick by clicking on the link below:
brent@siquisoft.com

Projections:

Year One:

- Accelerate programming efforts on Si Quis platform
- Establish outsource team
- Set up marketing and sales activates
- Add feature sets to enhance all packages
- Fine tune company structure/ready to hire
- Launch beta-site
- Establish Board of Advisors

Year Two:

- Make key management hires
- Financial (CFO), Operations (COO), Marketing/Sales (CMO), Lead Counsel
- Establish physical office
- Accelerate programming efforts
- Expand programming team
- Expand outsource team
- Build marketing / sales teams
- Build on-boarding and support teams
- Operate beta-site

Year Three:

- Expand office facilities
- Continue team expansion
- Contract call center / customer hotline
- Ready for expansion phase of business

Year Four:

- Massive (4x) marketing expansion:
To \$1.0MM from \$250K
- Massive (3x+) sales expansion:
To \$1.0MM from \$350K
- Find M & A support:
- Acquire synergistic businesses

Year Five:

- Increase marketing push with spend of \$2.0MM for fiscal year 5.
- Increase sales push with spend of \$3.3MM for fiscal year 5.
- Integrate businesses (if any)
- Commence shareholder exit strategies - IPO, Merger, Sale

Note: Pre-launch is 1/1/22 to 6/30/22. Expected fiscal year is July 1 of each year.

Round Information

Si Quis Software, LLC is seeking to raise \$500,000 USD in the form of (a) convertible note of \$500,000 with the following terms: 8% interest, 1 year term, 20% discount at the next qualified investment or triggering event. The "first money" in minimum tranche size is \$250,000 and will receive an additional 5% discount. Second (and beyond) money in minimum tranche size of \$25,000 or the remainder of availability.

(b) We anticipate securing a Series A round of financing of \$2,000,000 to \$5,000,000 to accelerate growth of Si Quis Software 12 months after the initial round of financing.

The proceeds will be used to:

- (i) complete "front-end" programming of the siquisoft platform (the "beta-site"),
- (ii) launch a version of the beta-site (planned as "Aircraftwest"),
- (iii) operate the beta-site in real-time,
- (iv) accelerate back-end programming of the siquisoft platform and
- (v) fund general operations for approximately one year.

The tables below approximate the projected income statement above and can be used to model different assumptions relative to projected number of clients and the revenue and expense generated for years 1 through 5 post financing. The "Default" settings represent our "envisioned" path.
(Note: Only available online)

Assumptions:

-------------------	-----------	-------------	-------------	-------------	--------------

Our go-to-market strategy is two-fold:

First, we intend to launch an initial beta-site; **Aircraftwest** using the Si Quis platform. This is an aviation-based business owned and operated by us. *We chose the Aviation space because of Brent's passion for all things aviation and the relatively broad horizontal market.*

We have allocated approximately 6 months to finalize the front-end development and beta testing of the site (depicted in the forecast Income Statement). After certain goals are met we plan to launch our

Starter Plan and Growth Plan packages with the Professional Plan and the Enterprise plan following later in that initial fiscal year.

Addressing the "Cold Start Problem" (as described by Andrew Chen - The Cold Start Problem) [15] will be our primary objective for Aircraftwest and Si Quis Software. Marketing activities will include 3rd party lead generation and SEO tools (Hubspot, Iterable, Brightspot, etc...), in-house promotion, social media and trade shows. We anticipate an introductory pricing model to build awareness and acceptance.

Sales activities will be handled by our team and will concentrate on building membership, classifieds, directory listings, events, native advertisers and more.

The site will provide us with real-time data regarding user experiences and monetization metrics to help us fine tune the Si Quis platform needs and monetization model.

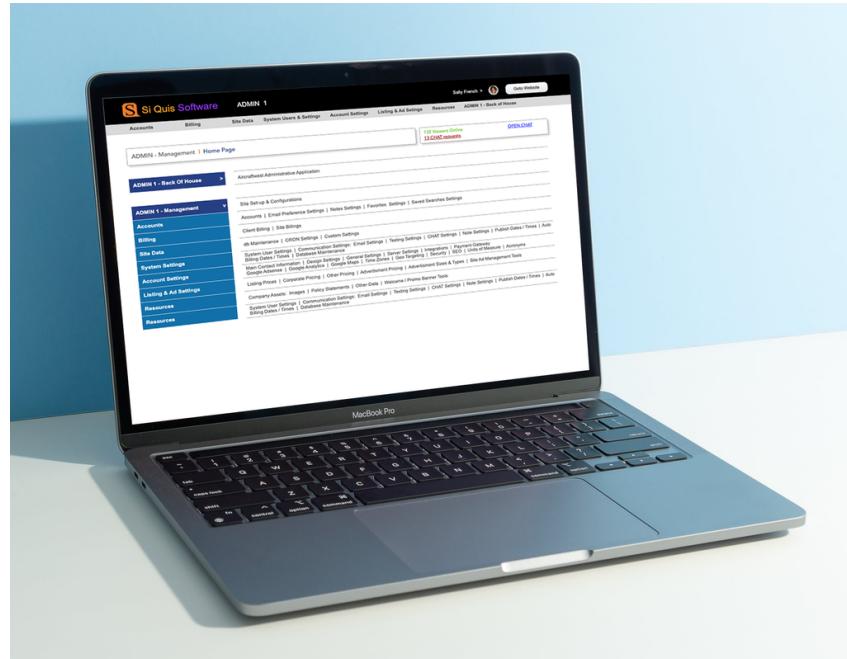

Second, post launch of Aircraftwest, we will be focusing our resources on marketing and sales of the Si Quis Software platform, creating interest and building business using similar tools to accomplish.

10 | Platform

The Si Quis Platform is comprised of three instances. ADMIN 1 accessed by Si Quis Software team members to set up and manage accounts. Client ADMIN for our clients to configure and manage their site and the "Front-end" public-facing website anyone can access.

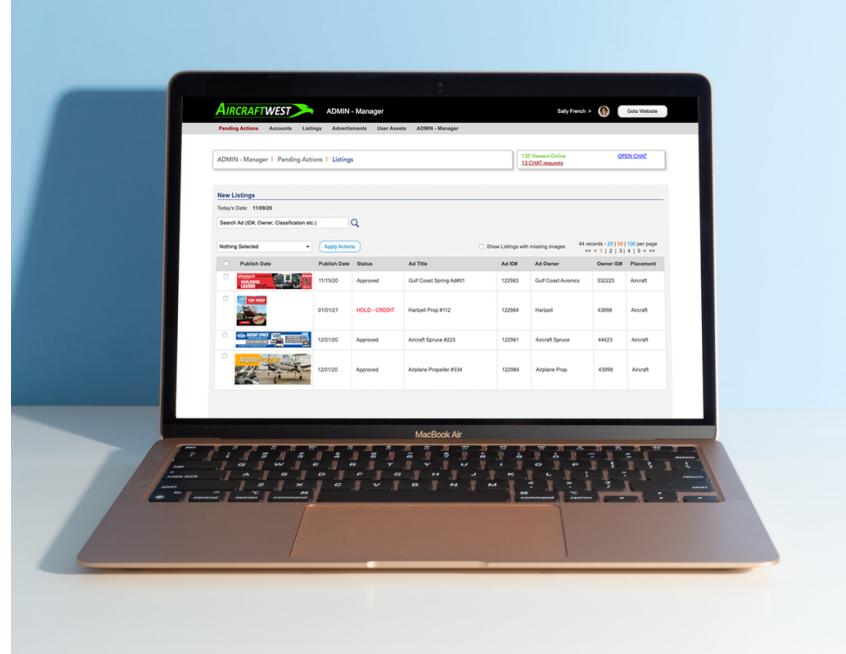

The ADMIN 1 site contains the following:

- Account Set-up
- Account Credentials
- Billing module
- Advertising Manager
- Client Manager Tools
- Front-End Set-up
- User Set-up module
- Client Data Management
- Database Management
- Forums Management
- Directory Management

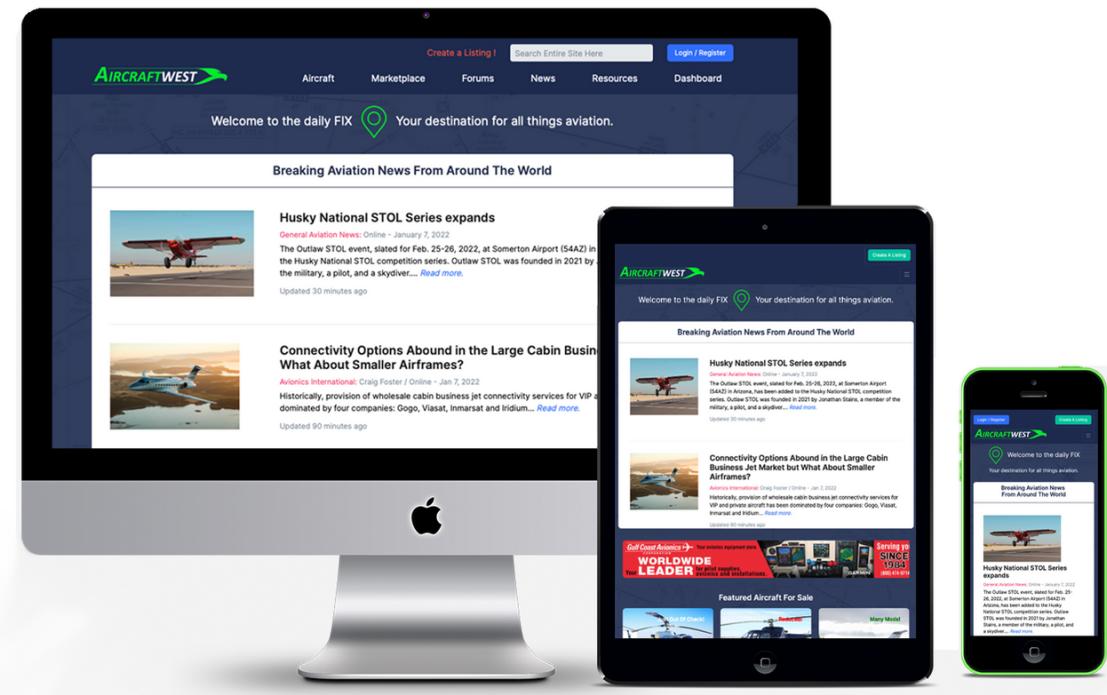

The Client ADMIN site contains the following

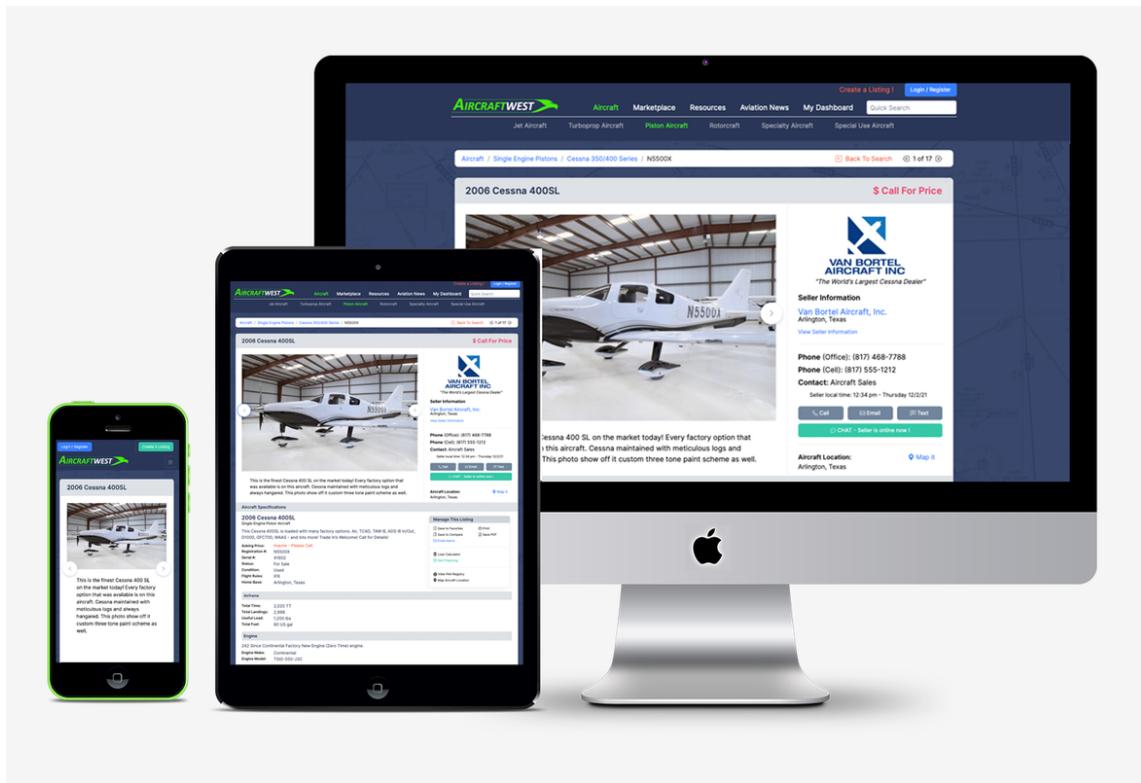

- Account Set-up
- Account Authorizations
- Billing module
- Advertising Manager
- Front-End Settings
- User Set-up
- Data Management
- Database Management
- Account Management
- Listings Management
- Forums Management
- Directory Management

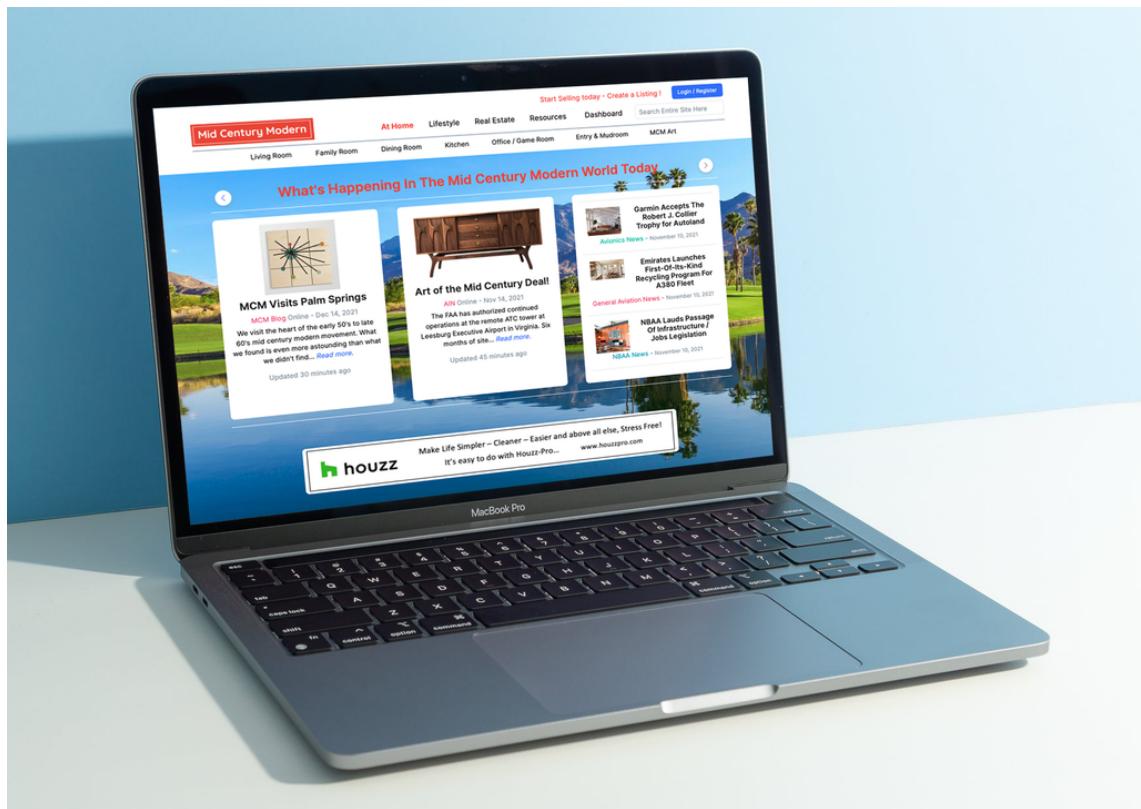

Front-End:

Once configured using the ADMIN 1 and ADMIN sites, the Front-End site can be published. Below are examples of the Aircraftwest HOME page and listing detail page, as well as an example of a niche-business focused on all things *Mid Century Modern*.

An example of a different client Front-end sites using the Si Quis Platform.

11 | Team

**Brent Bostwick,**

Founder and Managing Member

Brent is a passionate entrepreneur with years of experience running companies in the b2b software, alternative energy and multi-channel consumer products space. Brent's experiences include leading small organizations of 10 to larger organizations of 700+; revenues from \$1M to \$150M; and equity raises with angles to VC's of \$750K to \$134M. Brent is also a passionate and avid pilot with multiple ratings and over 6,000 hours of flight time in more than 35 different aircraft he has owned through the years. Brent can say unequivocally passions are strong motivators. [\[Linkedin\]](#)

**Bryan Reed,**

Founder and Member, Head of Technology

Bryan is a passionate and self-motivated software engineer and developer who enjoys building end to end applications. He is focused on system architecture and system scaling to ensure smooth and seamless growth potential while ensuring maintainability through code efficiencies. In addition, Bryan has years of experience in large scale multi-tenant database driven applications and systems integrations. Bryan has held prominent positions in back-end software development for Commrse, Sitecrafting, Brightleaf Web and others. Bryan is currently Senior Manager, ERP, Integrations and IT for a well-established international consumer products company. [\[Linkedin\]](#)

12 | Vision

We believe our solution of combining core interests and commerce will transform the way people and companies balance work/life needs and turn their passions into profits. Now, more than ever, regardless of who coined the term, or how it's described, the "Passion Economy" is here and it is on the rise.

Sara Wilson, an LA-based digital strategist and founder of SW Projects described these passion-based business as "digital campfires. She writes in the Harvard Business Review:[14]"Without question, the digital campfire trend is firmly on the radar of the big social platforms... Mark Zuckerberg wrote in a March 2019 public post, announcing a strategic shift toward more closed, private modes of communication."

Zuckerberg is paying attention to this shift not only because the data shows that Facebook is losing young audiences, but because the re-direction of attention to more private modes of communication represents a major challenge for the company.

It is neither simple nor straightforward to reach audiences gathered around digital campfires. But as traditional social platforms grow, they become more crowded, and it becomes more

difficult and expensive to reach people there anyway. In light of this, digital campfires become a much more attractive alternative — one that requires more groundwork and more careful tending, but one that could potentially have big payoffs for brands in terms of loyalty, retention, and long-term love.

In closing, thank you for your time and consideration, it is truly appreciated.

13 | Confidentiality Statement

CONFIDENTIALITY STATEMENT

This document contains confidential information proprietary to Si Quis Software, LLC hereinafter frequently referred to as the "Company", "Squis" or "Squisoft.com". This information and related conversations are submitted solely for the purpose of introducing selected parties to the Company's Business Plan. The Company's disclosure of information contained herein and in related conversations does not constitute any subscription or authorization to use the information, ideas, or concepts presented, or to disclose any information to other parties. The Company retains ownership of this Plan, and the concepts and ideas described herein.

Each recipient of this document agrees to treat it in a strictly confidential manner. The recipient may not disclose, directly or indirectly, or permit any agent or affiliate to disclose any of the information contained herein, or reproduce this document in whole or part without the prior written consent of the Company.

Any party who accepts delivery of this Plan or any other document or verbal communication of confidential information from the Company agrees to be bound by the terms of this Confidentiality Statement and further agrees to promptly return documents to the Company upon request.

14 | Investment Summary

INVESTMENT SUMMARY

The following is a summary of certain facts and details regarding Si Quis Software, LLC dba "Squisoft.com" ("Squisoft" or the "Company"). Prospective investors should not consider this Investment Summary to be a complete statement of all factors material to making an investment decision. This Investment Summary is qualified in its entirety by the information made available through the Squisoft on-line data room for the purpose of providing information to prospective investors. Investors are encouraged to review this information in its entirety.

Prospective investors are not to construe the contents of this Investment Summary or any prior or subsequent communication from Si Quis Software, LLC, (or employees, agents or affiliates thereof), as business, legal or tax advice. Each prospective investor must rely upon himself, herself, or his or her independent representatives (including his or her legal counsel and accountant) for advice as to business, legal, tax and related matters concerning a potential investment.

This investment Summary contains certain forward-looking statements within the meaning of Section 27 A of the Securities Act and Section 21 E of the U.S. Securities Exchange Act of 1934, (as amended). These statements appear in a number of

places in this Investment Summary. These forward-looking statements include the plans and objectives of Siquisoft' management for future operations, including plans and objectives relating to the future economic performance of Siquisoft. The forward-looking statements set forth in this Investment Summary include or relate to the successful implementation and operation of the business plan of Siquisoft.

The forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance, or achievements expressed or implied by such forward-looking statements to differ. The information contained in this Investment Summary, including without limitation the information under "RISK FACTORS", identifies important factors that could cause or contribute to such difference.

These forward-looking statements are based on various assumptions regarding Siquisoft and its proposed operations, and are subject to risks and uncertainties. Such assumptions involve judgments with respect to, among other things, future economic, competitive and market conditions, and future business decisions. Although Siquisoft' management believes that the assumptions underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate. As such, there can be no guarantee that the results contemplated in forward-looking information will be realized. In addition, as disclosed elsewhere in this Investment Summary, the business and operations of Siquisoft are subject to certain risks, which increase the uncertainty inherent in such forward-looking statements. In light of the uncertainties inherent in the forward-looking statements included herein the inclusion of such information should not be regard as a representation by Si Quis Software, LLC (or any of its affiliates), Siquisoft, or any other person that the objectives or plans of Si Quis Software will be achieved.

THE WORDS "MAY", "ESTIMATE", "ANTICIPATE", "PLAN", "INTEND", "EXPECT", "BELIEVE", "PROPOSED", AND SIMILAR EXPRESSIONS ARE INTENDED TO IDENTIFY FORWARD-LOOKING STATEMENTS, BUT ARE NOT THE EXCLUSIVE METHODS FOR IDENTIFYING SUCH STATEMENS. THESE FORWARD-LOOKING STATEMENTS INVOLVE AND ARE SUBJECT TO KNOWN AND UNKNOWN RISKS, UNCERTAINTIES, AND OTHER FACTORS THAT COULD CAUSE THE ACTUAL RESULTS, PERFORMANCE (FINANCIAL OR OPERATING) OF SIQUISOFT.COM, OR ACHIEVEMENTS TO DIFFER MATERIALLY FROM THE OUTCOMES, EXPRESSED OR IMPLIED, BY SUCH FORWARD-LOOKING STATEMENTS OR THE PROJECTIONS SET FORTH HEREIN. POTENTIAL INVESTORS ARE CAUTIONED NOT TO PLACE UNDUE RELIANCE ON THESE FORWARD-LOOKING STATEMENTS, WHICH SPEAK ONLY AS OF THE DATE HEREOF. SI QUIS SOFTWARE, LLC AND ITS AFFILIATES SPECIFICALLY DISCLAIM ANY OBLIGATION TO RELEASE ANY REVISIONS TO THESE FORWARD-LOOKING STATEMENTS TO REFLECT EVENTS OR CIRCUMSTANCES AFTER THE DATE HEREOF OR TO REFLECT THE OCCURRENCE OF UNANTICIPATED EVENTS.

COMPANY RISK FACTORS

The following Risk Factors have been prepared by the Company and will be circulated to all prospective investors in the Convertible Note offering. Si Quis Software, LLC has not had an independent third party approved or disapproved of these Risk Factors and has not independently determined whether such Risk Factors are accurate or complete.

An investment in the Company involves a high degree of risk and is suitable only for investors of substantial means who have no immediate need for liquidity of the amount invested, and who can afford a risk of loss of all or a substantial part of such investment. In addition to the other information contained in this Agreement, you should carefully consider the following risks before making an investment decision. Due to the growth stage of the Company and these other risks, you

could lose all or part of your investment. The risks and uncertainties described below are not the only ones the Company faces. Additional risks and uncertainties, including those not presently known to the Company or that the Company currently thinks are immaterial, may also impair the Company's business operations. If any of the following risks actually occur, the Company's business, financial condition and results of operations would likely suffer. In such case, you may lose all or part of the money you paid.

The Company has a product that has been proven with little adoption. The Company has spent the past 5 years developing and modifying the existing platform to meet the needs of wholesale-distributor clients. The company has not undertaken the task of marketing and selling the platform actively and can make no assurances the markets will adopt the technology.

The Company has a limited operating history. Since the Company was first formed, it has not produced a profit. There is no assurance that it will ever produce a profit or that, if it achieves profitability, it will be able to sustain it. As a new enterprise with a unique product offering, it is likely to be subject to risks its management has not anticipated, which may adversely impact its operations.

Financial forecasts are for illustrative purposes only. Any projected or pro forma financial statements delivered to prospective investors ("Financial Forecasts") are for illustrative purposes only and must not be relied upon by the prospective investor. The Financial Forecasts reflect estimates of future results of operations developed by the Company without independent evaluation or analysis, and are based upon assumptions that may or may not occur and over which the Company will have little or no control. For instance, the cost of capital and professional services are inherently difficult to predict, and the Company may have to spend more on these items than the budgeted amount. The assumptions made by the Company are inherently subjective. There can be no assurance that actual events will correspond with these assumptions, and costs in excess of budget will impact the Company's ability to achieve its projections. Actual results for any period may or may substantially not conform to the Financial Forecasts.

The Company has capital needs. The Company has limited resources. If it does not conclude the Convertible Note offering it will lack funds to grow the operations. Furthermore, the Company's operations are expected to continue to consume substantial amounts of cash following the Convertible Note offering, and the development and marketing of the Company's products will require a commitment of substantial additional funds. This may require additional financings. If the Company is unable to raise the funds sought in future financings, when needed, it may lack sufficient capital to execute its business plan. Additionally, unforeseen expenses, including such things as changing customer requirements or additional functionality required to remain relevant could cause the Company to consume funds more rapidly.

The Company may not have sufficient financial resources to successfully compete in the Passion Economy. There are a number of enterprises that are striving to provide products or services that are similar in nature to the Si Quis Software platform. The Company will be competing with established businesses that have an operating history, and greater financial resources, management experience and market share. There can be no assurance that Si Quis Software will be able to compete or capture adequate market share. The Company will not be profitable if it cannot compete successfully with other businesses.

Si Quis Software depends on the services of key employees that would be difficult to replace. The Company's success depends substantially on the services of key personnel, Brent Bostwick, Managing Member and Bryan Reed, Member and Technology Officer. The Company's success depends on the performance of these personnel and on its ability to retain and motivate high quality personnel, especially its management. The Company's future success depends on its continuing ability to identify, attract and retain highly qualified personnel and the failure to do so could have a material adverse effect on the Company's business, operating results and financial condition.

Previous to the closing of the Convertible Note, the Company's financial statements have been unaudited. While the Company believes its current and previous financial statements are accurate, they have not been audited by an independent qualified organization. Errors or misunderstandings in those statements could misrepresent the Company's current financial position. (Following the closing of this Convertible Note offering, the financial statements will be annually audited by an independent qualified organization).

There is control by Principal Stockholders. The Company's founders currently control a large majority of the Company's outstanding voting shares, and, accordingly, they are able to exert substantial influence over the Company.

There will likely be a lack of Dividends or Other Distributions. It is unlikely that the Company will pay cash dividends or make any other distributions in respect of the Convertible Note in the foreseeable future.

[The Cold Start Problem](#)

The Cold Start Problem reveals what makes winning networks thrive, why some startups fail to successfully scale, and, most crucially, why products that create and compete using the network effect are vitally important today.

[About Our Name: "Si Quis" Software](#)

The concept of classified ads began appearing in England in the 1600s. Handwritten messages were nailed

Footnotes - Business Plan

to posts by scribes and became known as "Si Quis", [5] a term borrowed from ancient Rome where most posted notices began with the words Si Quis — meaning "If anybody knows of..."

Today the sheer number and variety of classifieds worldwide has grown exponentially into broad, albeit fragmented horizontal markets. Never before has creating and posting a "Si Quis" been so easy and affordable with a reach far beyond the street posts of the 17th century.

Most importantly however, never before have individuals had the resources to pursue things they are passionate about, which brings us to back to our name... Si Quis Software.

We've taken liberty to expand upon the definitions of "Si Quis", taking it beyond the concept of classifieds in the 1600's and associating it with the emergence of the Passion Economy of the 21st century. "If anybody knows of something related to my passions..."

[Under the Influence - The first classified ads ever published](#)

Classified ads began appearing in England in the 1600s. They were handwritten, and nailed to posts. Scribes made their living writing announcements, which were, for all intents and purposes, classified ads. And these ads weren't called ads — they were called Si quis.
